

# Ruben Sanchez

Born and raised in Madrid, adopted by Barcelona and Dubai in the past years, Sánchez is a self-taught artist with a strong, colorful graphic style that resonates through all of his projects.

Coming from the cultural worlds of graffiti and skateboarding, Sánchez learned by himself graphic design and illustration. In the mid 2000's he mixed the techniques and influences from each field, adding new skills on wood, resins, etc with a continue self-education in arts, where he started translating his own

vision onto canvases, murals, reclaimed wood, sculptures or installations.

His artworks can be found all around the globe, as a part of art festivals, humanitarian projects or international exhibitions but also as 'uncommissioned' works in all kind of places.

If you dissect his work you will find the avoidance of symmetry and perfect proportions, vibrant color palettes where you can depict different elements and characters in fragile balance with strong interactions.

Visual tension, chain reactions and connectivity, always surrounded by a Mediterranean vibe, in a journey with no destination.
